Amendments to US Patent Application

US Patent Application Number: 10/733,144

Filing Date: 02/09/04

Inventor: Philip Chidi Njemanze

Art Unit: 3739

Examiner: Gibson, Roy Dean

Dear Sir,

In response to office action dated 10/13/2005, I hereby have made the following amendments provided in copy marked "Unclean copy with corrections". All deleted materials appear with **striketthrough** and all additions are **underlined**. Another unmarked copy is provided with all corrections made.

General Comments:

1. US Patent Documents: The inventor has deemed it useful and informative to include the six patent documents cited by the examiner.
2. Specifications: Here deletions of materials related to the species not chosen were made. No new elements were introduced for the species chosen.
3. Claims: The claims have been corrected to a step by step format as advised by the examiner. No new elements were added in the claims.
4. Abstract: Deletions of the aspects of the abstract related to the species not chosen were made.
5. References: No changes were made.
6. Drawings: The drawings related to the species not chosen were deleted (Figures 4-9), and numbering deleted. The figures related to the chosen species were retained with no substantive changes except in numbering.

Thank you in anticipation,

Yours truly,

Dr Philip C. Njemanze MD.
Inventor.
